MEMBERSHIP GUIDELINES

Membership Guidelines

Application for membership in the Genetic Epidemiology Research Institute (GERI) is available to UCI Faculty who have demonstrable interest in the genetic basis of health and disease. GERI membership will be for a three-year term and reappointment can be extended where appropriate.

Information of the overall goals and objectives of the GERI can be found on our website at http://www.geri.uci.edu/

Eligibility for Active Membership

Demonstrable interest in the genetic basis of health and disease can be illustrated by working on a peer-reviewed extramural grant(s) for a project(s) with demonstrable relevance to genetics and/or documented activity in the form of recent peer-reviewed research publications or meeting abstracts relevant to the genetic basis of health and disease. Each applicant should indicate his or her primary discipline and research area that best fit his or her primary area of interest. Research projects pursued in GERI will be multidisciplinary and collaborative. Members will be expected to collaborate with other GERI members in interactive, multidisciplinary research studies and grants initiated through GERI.

Privileges

Members will be eligible to apply competitively to GERI for financial support (seed funds) of relevant collaborative pilot research projects. Contracts and grants services will also be available to GERI members as well as opportunities to collaborate on projects involving archived human tissues and prospective human studies. Members will also receive updated listings of ongoing GERI-related research and training programs, periodic announcements of GERI activities and relevant community activities (symposia, visiting speakers, GERI interdisciplinary conferences, etc.).
MEMBERSHIP APPLICATION FORM

Date: ________________________________

Name of Applicant: ___________________________________________________________________

Appointment title: ______________________________ Home Dept:___________________________

Mailing Address: _____________________________________________________________________

E-mail Address: ________________________________ Office Phone: __________________________

Please attach the following:

_____Curriculum Vitae and Bibliography

_____Brief description of your primary research interest and any other research interests relevant to genetic epidemiology.

Signature of Applicant Date

Hoda Anton-Culver, Ph.D. Date
Director, Genetic Epidemiology Research Institute

Email application form, CV and research description to:
